Re: Fw. st. recommend info requests. there are 2 now.

Trish.

I checked the results and its clear that we took a post treatment sample. Some may get confused and thought that sample was actually taken from the kitchen sink. In many cases we take the post sample from an outside hose, as long as we confirm its truly post treatment. I believe that's what happened in this case. I think Ex. 5-Deliberative is correct that she did not allow our sampling team inside their home.

Let me know if you need more information.

Rich

Subject: Fw: [Ex.1-Personal Primes] Info requests. there are 2 now.

I got another email from them today.

here are both emails with a draft response for your review.

1st email questions: Is the EPA still providing the water to homes on Carter Rd? Since the last we heard the water was fine has something new happened that has made the water unusable? Since the people are still being provided with water how long will it continue? Is their a specific reason why the truck that delivers the water needs to have an escort? I would hope these people are being charged for this since they refuse treatment options and that the taxpayers aren't paying for it.

2nd email (just got it): We just got our water test results and wanted to ask a few questions. I'm guessing these results were from the testing you did for us quite a while ago. (we didn't know more testing was being done on our water) The water was held and retested? The litigants had a second set of water samples taken that were tested? Looking at our results it seems that some say they were taken from our kitchen sink. None of our sampling was done inside our home. We just wanted to make sure that the EPA def. says we don't have anything in our water above safe limits.? We are guessing that now/after today the water truck will no longer be giving water to the litigants homes?

Draft response:

Hi Ms. Taylor! Hope you are doing well. I wanted to know if you would answer a few questions for me and if not maybe you could tell me who could. Is the EPA still providing the water to homes on Ex. 8-Personal Private? Since the last we heard the water was fine has something new happened that has made the water unusable? Since the people are still being provided with water how long will it continue? Is their a specific reason why the truck that delivers the water needs to have an escort? I would hope these people are being charged for this since they refuse treatment options and that the taxpayers aren't paying for it.

Thank you very much,

EX. 6 - Personal Privacy
